SUMMARY

Full Stack Developer with hands-on experience building and deploying web applications using JavaScript, TypeScript, React, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Skilled in REST API development, authentication and authorization, real-time applications with Socket.IO and WebSockets, database design, and frontend-backend integration. Also built AI chatbot and voice assistant features using LLM APIs and Python. Shipped 35–40 fullstack features, maintained 30–50 REST API endpoints, and supported 500–600+ active users.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3
Frontend: React.js, Next.js, TanStack Query (React Query), Tailwind CSS, ShadCN, Vite
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, Authentication, Authorization, Zod, Socket.IO, WebSockets
AI / Voice: LangGraph, RAG, Embeddings, LLM APIs, ElevenLabs
Databases: MongoDB, Mongoose, PostgreSQL, MySQL, Redis (Streams), Qdrant, Prisma ORM, Drizzle ORM, Neon PostgreSQL
Tools: Git, GitHub, VS Code, Postman, Vercel, Render, npm, pnpm

PROFESSIONAL EXPERIENCE

Full Stack Developer | MentorChamp Month YYYY – Present

Promoted from Full Stack Developer Intern to Full Stack Developer

- Built and maintained **30–50 REST API endpoints** with Node.js and Express.js for authentication, application data, and business logic as part of a **10-member engineering team**.
- Shipped **35–40 fullstack features**, integrating REST APIs with client-side state management to deliver responsive application workflows.
- Implemented **JWT authentication and authorization** and **Socket.IO/WebSocket** real-time features supporting **500–600+ active users**.
- Launched a **Reddit-style forum module in 7 days** with posts, threaded comments, notifications, and user interactions; onboarded **500–600 users** and **25+ posts** during the initial launch period.
- Integrated an **LLM-powered AI chatbot** into the PWA and CRM, handling **300+ conversations per week** with **70% resolved without human intervention**; added real-time typing and status indicators, hand-off to human agents, and dashboard-controlled access per user.
- Engineered **AI voice bot** features on ElevenLabs Conversational AI supporting **100+ in-app calls per day**, with server-issued token security, per-plan daily call limits, outbound check-in calls with transcripts and recordings in the CRM, and a callback queue with role-based access, agent assignment, and 10-minute SLA tracking.

PROJECTS

Tradeora | React, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS GitHub | Live Demo

- Developed a full-stack stock trading platform with secure authentication, buy/sell order placement, holdings and portfolio management, and complete order history.
- Designed REST APIs with Node.js, Express.js, MongoDB, and Mongoose; used TanStack Query and Socket.IO for efficient data fetching and real-time updates.

Streamify | React, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS GitHub | Live Demo

- Created a MERN-based social language-learning platform with authentication, user connections, real-time chat, and video calling.
- Modeled MongoDB schemas and REST APIs with Node.js, Express.js, and Mongoose; synchronized client and server data with TanStack Query.

RAG Chatbot | Next.js, React, TypeScript, PostgreSQL, Drizzle ORM, Tailwind CSS GitHub | Live Demo

- Engineered a Retrieval-Augmented Generation (RAG) application supporting PDF upload, natural-language queries, semantic search, and context-aware answers.
- Integrated Hugging Face embeddings, an OpenAI-compatible LLM, Clerk authentication, and Neon PostgreSQL with Drizzle ORM.

Tomato | React, TypeScript, Vite, Node.js, Express.js, PostgreSQL, Prisma ORM, Tailwind CSS GitHub | Live Demo

- Delivered a full-stack food delivery application with authentication (Better-Auth), email verification, menu browsing, cart management, order tracking, and Stripe payment processing.
- Added an admin panel for dish management and customer order history.

OPEN SOURCE

create-stackkit | Node.js, npm CLI npm Package

- Published a project-scaffolding CLI that bootstraps full-stack applications with one command, automating framework selection, project structure, and boilerplate configuration.

EDUCATION & CERTIFICATIONS

Bachelor of Commerce (B.Com) | KBP College
Delta Full Stack Web Development | Apna College
